pro shower vitamin c :

The innovative
100% Japanese
hand shower
reserved for
professionals.

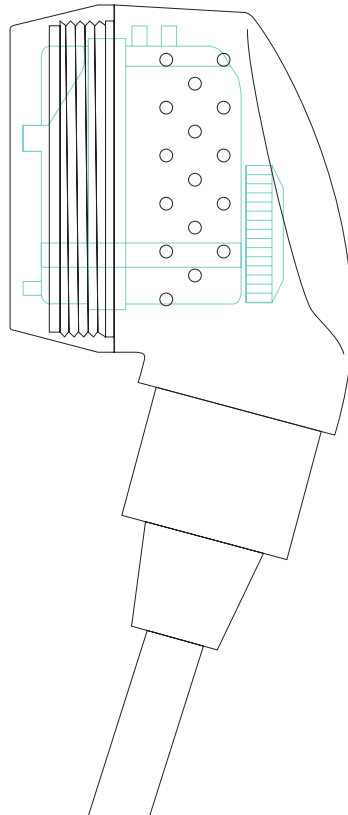

Arromic presents its new 100% made in Japan hand shower, reserved for professionals.

When washing hair, the number one enemy for the hair fiber is limescale in the water. Drying them out, it washes them out, weakens them and dulls their colour.

To solve this problem, Arromic has developed specific filters inside its PRO SHOWER VITAMIN C hand shower and a revolutionary vitamin C reservoir system to overcome the limescale present in water.

This new hand shower also offers an incomparable quality of water jet, with massaging and oxygenating properties that will delight your customers during their visits to the shampoo trays.

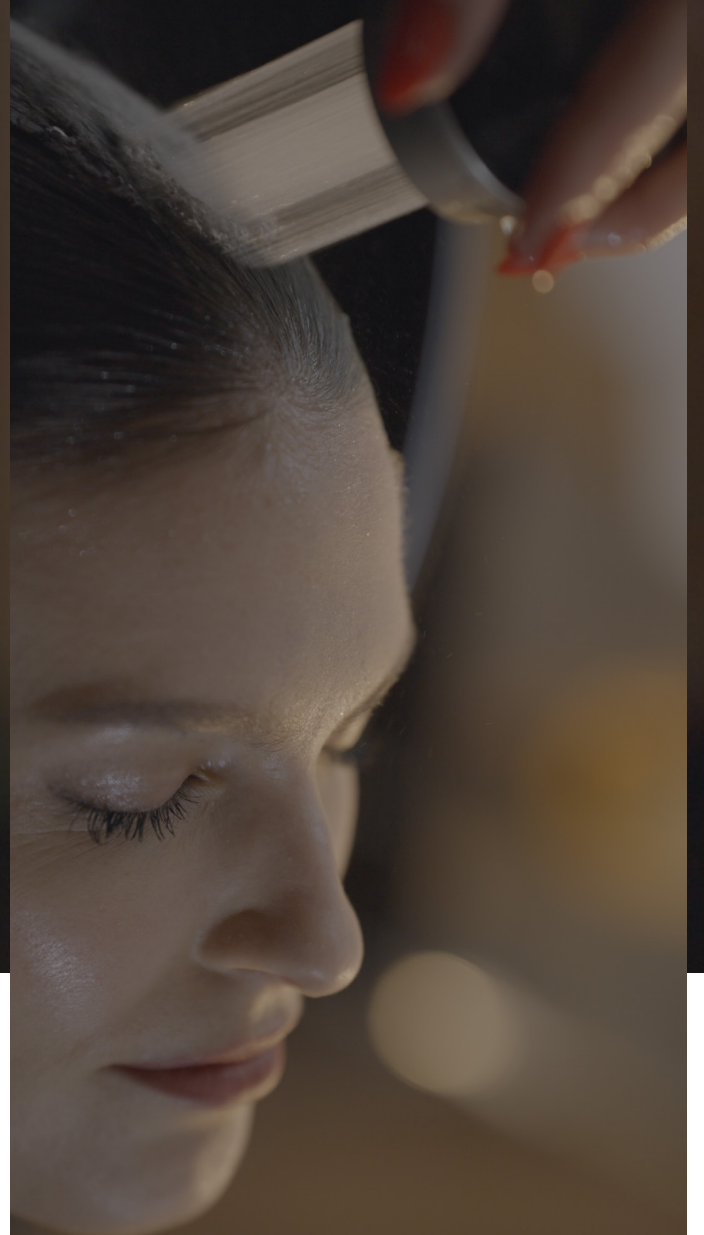

Finally, the PRO SHOWER VITAMIN C shower also reduces water consumption by more than 40%. ARROMIC is Japan's leading shower brand and manufacturer of shower heads that are revolutionizing the industry. Each invention is the result of several years and numerous international patent filings.

Five promises

1. Faster rinse
2. -40% water consumption
3. Increased jet power
4. Lime-free water
5. Oxygenated water

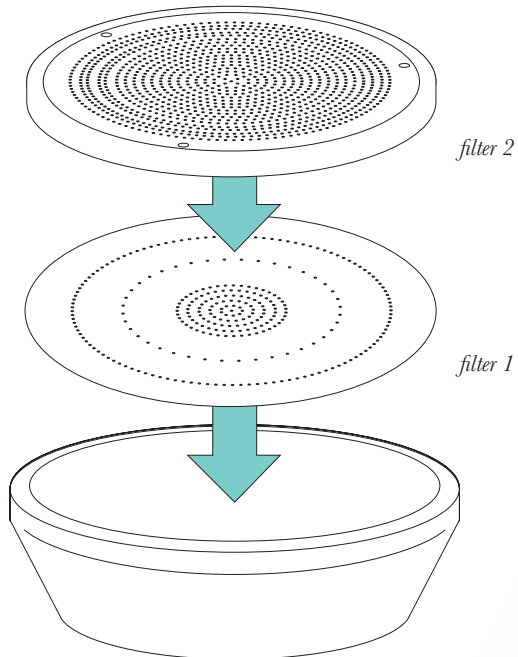

Zen water:

The Latest Japanese Innovation

With the PRO SHOWER VITAMIN C hand shower, Arromic unveils its new «double filter» technology that allows a jet of a unique quality, very different from that of all the other hand showers on the market.

Inside the hand shower is a 0.4 mm thick stainless steel filter with 256 holes with a diameter of 0.3 mm. These microscopic holes allow an unrivalled water jet while drastically reducing water consumption. This patented system makes rinsing easier, making it faster and more efficient.

The water generated by the PRO SHOWER VITAMIN C hand shower is then enriched with numerous oxygen bubbles that make it easier to remove all impurities. They also provide a unique sensation of massage for a relaxing and zen effect. Each visit to the shampoo tray is then similar to a mini SPA that will be an asset for your hair salon.

Ergonomic

In addition to its sleek look with a futuristic look, the PRO SHOWER VITAMIN C shower head is also very easy to handle thanks to its small size.

Its design has been designed to facilitate the narrow passage between the edges of the shampoo tray and your clients' hair. From now on, it will be easy to clean hard-to-reach areas such as the nape of the neck, which is often neglected due to lack of space in shampoo tubs. Its ergonomic shape has also been studied to limit as much as possible the musculoskeletal disorders (MSDs) that hairdressers can suffer from in the wrists and hands.
